

SCOTT ADLEM-QILLUNIQ

Electrician Journeyperson

HOPE BAY, TMAC RESOURCES

Scott Adlem-Qilluniq was born in Yellowknife, the closest hospital to his early home in Cambridge Bay. Scott is Netsilingmiut and spent many summers with his dad and their family in his home community of Taloyoak.

He went to school in Yellowknife and when he graduated from high school, he went into trade school to become an electrician. He completed his program in the Northwest Territories and at Red Deer College in Alberta.

While in school, Scott became a father to two boys. It was not easy to commit to school with two young children and there were times when Scott felt that leaving school would make things less complicated and allow him more time for his young family. What he did instead was to change his program slightly and take a little longer to finish but to “stick with it,” he said.

In 2014 Scott completed his red seal and is a journeyman electrician. The Interprovincial Standards Red Seal Program sets common standards to assess the skills of tradespeople across Canada. Industry is heavily involved in developing the national standard for each trade. It is a partnership between the federal government and provinces and territories, which are responsible for apprenticeship training and trade certification in their jurisdictions.

Tradespersons who have successfully passed the red seal examination receive a red seal endorsement on their provincial/territorial trade certificate.

“I am very proud of what I have been able to accomplish. I enjoy my work, I am good at what I do, and I learn new things all the time. I had the support of my family but in the end, I had to really want this and commit to it to make it happen.”

JOB GOALS

- Provide electrical support at Hope Bay both underground and on surface, electricians are responsible for installation, testing, troubleshooting, diagnosing, repairing, and maintaining all types of mining and processing equipment
