- Strong ability to communicate in English (oral and written)

EDUCATION AND TRAINING NEEDED

- High school diploma
- Post-secondary education in an environmental field
- 2-5 years of field experience, ideally in mining operations
- Valid driver's licence

JAMIE KATALUK

Environment Technician, Senior

MEADOWBANK, AGNICO EAGLE

Before Jamie became an environmental technician at Agnico Eagle's Meadowbank mine, he worked for Canada Post, in Baker Lake.

Jamie saw that Agnico Eagle could provide him with an interesting career and he started with the company in 2009, with the environment department. Jamie has since advanced to be an environmental technician.

Every day provides Jamie with a variety of work, from water sampling, to wildlife monitoring, to filing reports. He works closely with a team that has grown to be a family away from home. Jamie's knowledge about wildlife and his connection to the land allow him to help Agnico Eagle better understand wildlife behaviour and forecast events.

Jamie often represents the environment department during community meetings where he hears community concerns about wildlife and the land, and afterwards helps Agnico Eagle find a way to address these concerns. His work and dedication make him valued and respected by both Agnico Eagle and his community.
