- Working knowledge of Microsoft Office software
- Strong English communication skills, written and spoken

### **EDUCATION AND TRAINING NEEDED**

- Successful pre-entrance exam

## **LEO KARETAK**

### **Millwright Mechanic**

**MEADOWBANK, AGNICO EAGLE**

Leo is a millwright mechanic at Meadowbank. For Leo one of Agnico Eagle's mines in Nunavut. For Leo, the day starts off with a safety meeting, in which he receives information regarding the jobs or tasks he will be doing that day. They are always ready for new jobs and challenges since the machines they will be working on to fix will change, and no two days are the same.

Before he was with Agnico Eagle, Leo worked for Boart Longyear as an assistant driller, doing surface diamond drilling. When he first started working at Meadowbank as a millwright mechanic apprentice, Leo was working towards achieving his red seal journeyman certification.

As he grew and learned on the job, Leo feels that he became better at relating to and working with his crew to know what needs to get done and do it right. The job of millwright mechanic is one Leo loves, as it allows him to be challenged every day.
