- Working outside of the office
- Working with heavy equipment, moving earth

JOSE AWA

Heavy Equipment Operator

MARY RIVER, BAFFINLAND IRON MINES

Jose Awa worked with Nuna at the Mary River Mine for two years before joining Baffinland in 2016 as an operator in the company's mine operations team. When Baffinland recognized Jose's exceptional driving abilities and offered him a full-time job directly with Baffinland, Jose jumped at the opportunity to not just have a job but to build a career.

Jose did not receive formal operating training before joining Baffinland, but since then, he has received significant on-the-job training. Recently, Jose been selected to learn how to operate even bigger equipment because of his excellent performance.

While there isn't much time outside of working hours, Jose says that people on site are generally good and that there are lots of activities available on site including a gym, recreational room, television room, and musical instrument room.

Jose's career goal is to continue his training and development as part of the mine operations team and learn how to run every piece of equipment used by the team.
